Summary

Full-Stack Software Engineer with 4+ years of experience building production-grade web applications using Java, Spring Boot, React.js, and MongoDB. Skilled in designing secure REST APIs, JWT-based authentication, and role-based access control for scalable, real-world systems. Recently completed an intensive Full Stack Development with GenAI program, with hands-on experience in AI-assisted development and prompt engineering using tools like Claude Code. Adept at end-to-end ownership – from schema design to production deployment.

Experience

Software Developer

Smart Tech AI Labs Pvt Ltd

Aug 2022 – Jun 2026

Hyderabad, Telangana, India (Hybrid)

- Developed and enhanced full-stack web applications using Java, Spring Boot, React.js, and MongoDB, translating evolving business requirements into scalable, maintainable features.
- Improved application performance score from 85 to 95 (10% improvement) through targeted optimization, debugging, and refinement of backend and frontend components.
- Built and maintained automated test suites using JUnit 5, Mockito, MockMvc, Spring Boot Test, React Testing Library (RTL), and Cypress, improving application reliability and reducing regression issues by 8%.
- Diagnosed and resolved complex production issues, including data duplication and recurring exceptions, by implementing robust validation and exception-handling mechanisms.
- Integrated PySpark-based data processing pipelines to support large-scale data operations, increasing data retrieval efficiency by 25%.
- Worked across MongoDB and SQL-based databases, adapting data-access solutions as application and business requirements evolved.
- Collaborated with clients and product stakeholders to gather requirements and propose technical solutions, while driving code reviews that upheld code quality, scalability, and maintainability.

Frontend Developer

Tenacity Security

Mar 2020 – Feb 2021

Kolkata, West Bengal, India

- Developed and maintained responsive, cross-browser web interfaces for the company website using JavaScript, HTML, and CSS, improving usability and accessibility.
- Built reusable UI components and integrated them with backend REST APIs to support new product features and internal tools.
- Partnered with backend developers and designers to translate wireframes and requirements into functional, pixel-accurate front-end implementations, increasing development efficiency by 20%.
- Improved page load performance by 20% through code optimization, asset minification, and reduction of render-blocking resources.
- Used Git-based version control and participated in code reviews to maintain consistent code quality across the front-end codebase.

Web Development & Operations Intern

Tenacity Security

Sep 2019 – Feb 2020

Kolkata, West Bengal, India

- Collaborated cross-functionally with engineering and design teams to build and maintain the company website, delivering both front-end and back-end features.
- Supported the end-to-end deployment pipeline from local development through production release, reducing deployment time by 15%.
- Assisted with employee enrollment and payroll workflows, improving onboarding turnaround by 10% and gaining hands-on exposure to organization-level HR operations.

Projects

FinVault Plus – Full-Stack Fintech Wallet & Data Platform – Personal Project | GitHub

Feb 2026 – Apr 2026

- *Tech Stack: Python, FastAPI, PostgreSQL, SQLAlchemy, Alembic, React 19, TypeScript, Docker, GitHub Actions (CI/CD), PySpark, Delta Lake, Azure Data Lake Storage Gen2, Databricks, JWT, REST APIs, pytest*
- Architected and built FinVault Plus, a production-style fintech wallet and medallion data platform, rewriting a prior Java/Spring Boot + MongoDB system in Python/FastAPI + PostgreSQL with an append-only ledger for auditable money movement (transfers, expenses, split bills, KYC-gated operations).
- Implemented layered backend architecture (FastAPI routes → services → repositories) with Pydantic validation, SQLAlchemy ORM, and Alembic migrations; enforced atomic wallet updates using PostgreSQL row-level locking and dual-entry ledger writes to prevent inconsistent balances during peer-to-peer transfers.
- Developed 15+ REST API modules spanning JWT authentication, KYC review, wallet passbook, P2P transfers, social connections, and split-bill settlement, paired with a React 19 + TypeScript frontend built with TanStack Query and React Hook Form + Zod.

- Designed a Bronze-Silver-Gold data pipeline using PySpark and Delta Lake, exporting PostgreSQL ledger data via Azure Data Lake Gen2 and Databricks, backed by 55+ pytest tests and GitHub Actions CI.
- My Work Planner – Full-Stack Kanban Board** – Solo Project, NIIT StackRoute | GitHub | Live Demo Sep 2025 – Dec 2025
- *Tech Stack: Java, Spring Boot, React.js, MongoDB Atlas, Material UI, JWT, REST API, Vercel, Render*
 - Implemented an admin approval workflow for task completion with reject/reopen actions and audit-trail remarks, ensuring accountability across the task lifecycle.
 - Enforced Work-in-Progress (WIP) limits on active tasks to align with Kanban methodology best practices and improve workflow discipline.
 - Designed role-based boards with JWT authentication, allowing admins to manage all users’ boards while enforcing per-user access boundaries.

Technical Skills

Data & Big Data: PySpark, Apache Spark, Delta Lake, Databricks, Azure Data Lake Storage Gen2, SQL (Advanced)
Languages: Java, Python, JavaScript, TypeScript, HTML, CSS
Backend Frameworks: Spring Boot, FastAPI, Node.js
Frontend Frameworks & Libraries: React.js, TanStack Query, React Hook Form, Zod, Material UI (MUI), Tailwind CSS
Databases & ORM: PostgreSQL, MongoDB, MySQL, SQLAlchemy, Alembic
Tools & Platforms: Git, GitHub, GitHub Actions (CI/CD), Docker, Docker Compose, REST APIs, OpenAPI, JWT Authentication, Vercel, Claude Code
Practices: Full-Stack Deployment, Role-Based Access Control, Prompt Engineering, AI-Assisted Development

Certifications

NIIT StackRoute – Certified Software Engineer Jan 2026
Full Stack Development with GenAI – Honours Program

Claude Code & Claude Code in Action Apr 2026
Anthropic

Education

NIIT Limited Jun 2025 – Jan 2026
Full Stack Development with GenAI Program Remote, India

Savitribai Phule Pune University 2015 – 2019
Bachelor of Engineering, Computer Engineering Pune, Maharashtra, India

D.A.V. Public School
Class XII, CBSE Jamshedpur, India
